May 31st, 2020 - an experiment is a  
procedure carried out to support refute  
or validate a hypothesis experiments  
provide insight into cause and effect by  
demonstrating what oute occurs when a

---

---

particular factor is manipulated  
experiments vary greatly in goal and  
scale but always rely on repeatable  
procedure and logical analysis of the  
results'

'design of experiments

May 7th, 2020 - the design of  
experiments does or experimental  
design is the design of any task that  
aims to describe and explain the

---

---

variation of information under conditions that are hypothesized to reflect the variation the term is generally associated with experiments in which the design introduces conditions that directly affect the variation but may also refer to the design of quasi experiments'
