### **'The Impact of Pediatric Specific Vancomycin Dosing**

**December 17th, 2019 - new standardized dosing guidelines for pediatric patients and 3 improve adherence to the IDSA ASHP recommended trough goals through the application of the new guidelines MeThODs A multidisciplinary team comprised of 3 physicians an attending nurse and a pediatric pharmacist was assembled to conduct this QI project'**

### **'The Surgical Infection Society Guidelines on Antimicrobial**

**November 10th, 2019 - However the applicability of these recommendations to the pediatric population is not entirely clear Methods Systematic review of all literature regarding antimicrobial therapy in the**

---

---

**most common intra abdominal infection in children  
appendicitis with the goal of establishing guidelines  
for use"Therapeutic Drug Monitoring Importance  
Guidelines**

**April 17th, 2018 - Therapeutic drug monitoring is  
used for treatment as well as for diagnostic  
purposes It is easier to correlate the relationship  
between the drug's therapeutic or adverse effect on  
its concentration in the blood rather than with the  
dose administered"Antibiotic Resistant Septicemia  
in Pediatric Oncology**

**July 16th, 2019 - Death in cancer patients can be  
caused by the progression of tumors their malignity  
or other associated conditions such as sepsis which  
is a multiphasic host response to a pathogen that  
can be significantly amplified by endogenous  
factors Its incidence is continuously rising which  
reflects the increasing number of sick patients at a  
higher"An Evaluation of Vancomycin Dosing for  
Complicated**

---

---

**December 16th, 2019 - pediatric patients with complicated infections An initial regimen of 80 mg kg per day for these patients may be more likely to result in therapeutic steady state concentrations of vancomycin An Evaluation of Vancomycin Dosing for Complicated Infections in Pediatric Patients"**  
**Invasive Fungal Infections in the Pediatric Intensive Care**

May 15th, 2019 - CANDIDA INFECTIONS Candidemia is the leading IFI in hospitalized children and depending on the medical center is the third or fourth most common hematogenous infection 3 A declining trend has been recently noted in the incidence of pediatric candidemia in North America because of the implementation of guidelines that emphasize application of "**Production of icaADBC encoded polysaccharide**

December 18th, 2019 - Diemond Hernández B Solórzano Santos F Leños Miranda B et al Production of icaADBC encoded polysaccharide intercellular adhesin and therapeutic failure in pediatric patients with

---

staphylococcal device related infections'

**'Pediatric Urinary Tract Infections**

**December 24th, 2019 - Pediatric Urinary Tract Infections Steven L Chang MD Linda D Shortliffe MDT Department of Urology Stanford University School of Medicine 300 Pasteur Drive S 287 Stanford CA 94305 2200 USA The urinary tract is a common site of infection in the pediatric population'**

**'Therapeutic guidelines in paediatric infections Book**

November 14th, 2019 - A separate section covers prophylactic regimens for bacterial endocarditis sepsis meningitis and viral disease Finally methods are presented for the collection and transport of specimens For ease of use Therapeutic Guidelines in Paediatric Infections provides information in table format wherever possible"Therapeutics of Pediatric Urinary Tract Infections

**December 17th, 2019 - Therapeutics of Pediatric Urinary Tract Infections Claudia Espinosa Kristina**

---

---

**Bryant Kendra Bosley Pharm D Therapeutics of Pediatric Urinary Tract Infections Claudia Espinosa 1 Table 3 provides age based treatment guidelines for pediatric patients'**

**'2018 BPCA Priority List of Needs in Pediatric Therapeutics**

**December 27th, 2019 - and to publish a list of needs in pediatric therapeutics The BPCA Priority List consists of key therapeutic needs in the medical treatment of children and adolescents it is organized by therapeutic area which can be a group of conditions or a setting of care or a subgroup of the population" Clinical Practice Guidelines Cellulitis and skin infections**

**December 27th, 2019 - The typical presenting features of all skin infections include soft tissue redness warmth and swelling but other features are variable see table and photos below It is difficult to distinguish between skin infections caused by**

---

**GABHS and S aureus on a clinical basis alone'**  
**'Fungal Infections in Pediatric Patients A Review of**  
November 24th, 2019 - Invasive Fungal Infections in  
Pediatric Patients A Review Focusing on Antifungal  
Therapy which is reflected in several current therapeutic  
guidelines including those of the Infectious Diseases  
Society of America IDSA the European Conference on  
Infections in Leukaemia and the German Society of  
Hematology and Oncology'

**'Outpatient Healthcare Professionals Community**  
**April 16th, 2015 - Recommendations for appropriate**  
**antibiotic prescribing including clinical practice**  
**guidelines have been developed to improve**  
**outpatient treatment of common infections in**  
**children and adults CDC has developed materials**  
**that outpatient healthcare professionals can use to**  
**educate their patients"RACGP Paediatric urinary**  
**tract infections Diagnosis and**  
**August 7th, 2016 - Urinary tract infections UTIs are**

---

---

common in childhood An estimated 2 of boys and 8 of girls will experience a UTI by seven years of age and 7 of febrile infants will have a UTI 1 2 Paediatric UTIs especially in young children have varied and non specific presentations that can be undetected or misdiagnosed"

### ***Clinical Practice Guidelines***

*December 27th, 2019 - One of the main aims of the PIC is to reduce unwarranted variation in clinical care via the development endorsement publication and promotion of evidence based paediatric clinical practice guidelines CPGs that outline best practice clinical management of high volume and high risk paediatric clinical conditions"*

### **Vancomycin Serum**

**January 15th, 2017 - 2011 guidelines for the treatment of Methicillin Resistant Staphylococcus Aureus MRSA infections In a prospective observational cross sectional study in a university medical center in Tehran Iran 50 patients who**

---

received vancomycin for more than 4 doses were recruited and their trough vancomycin level was determined'

**'Guidelines of the French Society of Otorhinolaryngology**

*December 23rd, 2019 - The present guidelines are intended to update indications contraindications and administration modalities for non steroidal anti inflammatory drugs NSAIDs associated to antibiotics or not in pediatric ENT infections based on a critical analysis of the literature or else expert opinion'*

**'Treatment of Urinary Tract Infections in Children**

**December 24th, 2019 - Urinary tract infections UTIs affect approximately 2 4 to 2 8 of children every year in the United States and account for nearly 1 1 million office visits annually 1 Hospital costs for pediatric patients with pyelonephritis kidney infection total greater than 180 million per year in the U S 1 Diagnosis of a UTI may be difficult**

---

---

## **because"Systematic Review of Evidence Based Guidelines on**

February 19th, 2014 - Objectives To summarize recommendations of existing guidelines on the treatment of upper respiratory tract infections URTIs in children and to assess the methodological quality of these guidelines Methods We searched seven databases and web sites of relevant academic agencies Evidence based guidelines on pediatric URTIs were included'

### **'Skin and Soft Tissue Infections IDSA**

**December 26th, 2019 - A panel of national experts was convened by the Infectious Diseases Society of America IDSA to update the 2005 guidelines for the treatment of skin and soft tissue infections SSTIs**

**The panel s recommendations were developed to be concordant with the recently published IDSA guidelines for the treatment of methicillin resistant'**

### **'The Italian Society for Pediatric Nephrology SINEPe**

*December 15th, 2019 - On the basis of the 2015 Cochrane systematic review KDIGO Guidelines and*

---

---

*more recent data from the literature this working group with the contribution of all the pediatric nephrology centres in Italy and on the behalf of the Italian Society of Pediatric Nephrology has produced a shared steroid protocol that will be useful for National*

**'Opportunistic Infection Therapeutic Guidelines BC Centre for**

*December 15th, 2019 - DOWNLOAD Opportunistic Infection Therapeutic Guidelines Despite the reduction in the incidence of HIV related opportunistic infections since the introduction of highly active antiretroviral therapy HAART in 1996 significant numbers of patients continue to present with advanced HIV disease and the full spectrum of opportunistic infections'*

**'Ciprofloxacin as a Therapeutic Modality in Pediatric Burn**

*December 26th, 2019 - For the past decade ciprofloxacin has been the major drug in the treatment of pediatric bronchopulmonary exacerbation in cystic fibrosis pyelonephritis and cholangitis caused by P*

---

---

*aeruginosa 1 3 6 8 We found 11 studies or case reports from 7 countries where ciprofloxacin therapy was used in a total of 98 pediatric patients and the efficacy'*

**'Summary Pediatric Opportunistic Infection AIDSinfo**

*December 27th, 2019 - Summary Last Updated*

*November 5 2018 Last Reviewed December 15 2016*

*This report updates the last version of the Guidelines for the Prevention and Treatment of Opportunistic Infections OIs in HIV Exposed and HIV Infected Children published in 2013 1 These guidelines are intended for use by clinicians and other health care'*

**'Predictors of Serious Bacterial Infections in Pediatric**

**October 27th, 2019 - To determine predictors of serious bacterial infections in pediatric burn patients with fever core temp  $\geq 38.5^{\circ}\text{C}$  the authors conducted a retrospective review of medical records of pediatric 0-18 years patients admitted to the Arizona Burn Center between 2008 and 2011 with**

---

greater than 5 TBSA and inpatient hospitalization for  
'72 hours"Standards of diagnostic and therapeutic  
management of

December 20th, 2019 - Working Group of Polish  
Society of Pediatric Oncology and Hematology  
Polskie Towarzystwo Onkologii i Hematologii  
Dzieci?cej ? PTOHD based on ECIL4 guidelines and  
naonal experience prepared recommendations for  
strategy of diagnostic prophylactic and therapeutic  
management of bacterial infections in  
children" *Guidelines for the therapeutic use of  
NSAIDs in pediatrics*

*December 14th, 2019 - Guidelines for the therapeutic  
use of NSAIDs in pediatrics Nonsteroidal anti  
inflammatory drugs NSAIDs have an expanding role in  
pediatrics Currently only a low number of NSAIDs with a  
documented efficacy and tolerability is available for  
pediatric use'*

*'The Impact of Pediatric Specific Vancomycin  
Dosing*

---

---

*February 1st, 2017 - BACKGROUND AND OBJECTIVES There are limited data guiding vancomycin dosing practices in the pediatric population to target the goal troughs recommended by national vancomycin guidelines In this study we sought to improve adherence to guideline trough targets through a quality improvement intervention METHODS A retrospective analysis was"*
