symbiotic planet a new look at evolution margulis lynn
April 24th, 2020 - darwin and his modern successors
have shown very convincingly how inherited variations
are naturally selected but they leave unanswered how
variant animals are to be in the first place in symbiotic
planet renowned scientist lynn margulis shows that
symbiosis which simply means members of different
species living in physical contact with each other is
crucial to the origins of evolutionary novelty ranging
from bacteria the smallest kinds of life to the largest
the living earth'
