the physics of low dimensional semiconductors

May 24th, 2020 - the position of modern semiconductor heterostructures can be controlled precisely on the atomic scale to create low dimensional systems these systems have revolutionised semiconductor physics and their impact on technology particularly for semiconductor lasers and ultrafast transistors is widespread and burgeoning'

'**anderson s rule**

May 17th, 2020 - anderson s rule is used for the construction of energy band diagrams of the heterojunction between two semiconductor materials anderson s rule states that when constructing an energy band diagram the vacuum levels of the two semiconductors on either side of the heterojunction should be aligned at the same energy it is also referred to as the electron affinity rule and is closely related'
