'early ideas about matter chemistry visionlearning

May 27th, 2020 - the atom is the most basic unit of matter which makes up everything in the world around us. Each atom retains all of the chemical and physical properties of its parent element. At the end of the nineteenth century, scientists would show that atoms were actually made up of smaller subatomic pieces. Which smashed the billiard ball concept of the atom. See our atomic theory in the early days'
