Mark Bishop
May 5th, 2018 - Example 10.1
shows how the coefficients in a balanced chemical equation provide a number of conversion factors that allow us to convert from moles of any reactant or'

'General Chemistry Energy Changes in Chemical Reactions
September 17th, 2017 - The
release of energy in chemical reactions occurs when the reactants have higher chemical energy than the products. The chemical energy in a substance is a type of potential energy stored within the substance. This stored chemical potential energy is the heat content or enthalpy of the substance.'
