introductions

May 25th, 2020 - gravity is the weakest of nature's four fundamental forces yet over large distances it dominates this is because gravity unlike the other forces in nature is only ever attractive the gravitational force between objects always increases as they become larger and have more mass despite the efforts of isaac newton and albert einstein gravity remains an enigmatic puzzle from newton to'

'5 gravity and the figure of the earth very short

June 2nd, 2020 - gravity and the figure of the earth discusses the measurement of gravity and its variation at the earth's surface and with depth gravity is about 0.5 per cent stronger at the poles than at the equator and it first increases with depth until the core-mantle boundary and then sinks to zero at the earth's centre using satellites to carry out geodetic and gravimetric observations has'
