destroyed at the end of
the permian period 250
million years'

**'the permian extinction
when life nearly came to
an end**

May 21st, 2020 -
extinction is the plete
disappearance of a
species from earth
species go extinct every
year but historically the
average rate of
extinction has been very
slow with a few
exceptions the fossil
record reveals five
uniquely large mass
extinction events during
which significant events
such as asteroid strikes
and volcanic eruptions
caused widespread

extinctions over relatively short periods' '**extinction douglas erwin book review**
May 11th, 2020 - how life on earth nearly ended 250 million years ago the permian triassic extinction some 250 million years ago was the greatest of the mass extinctions that have struck the earth but its cause is still unclear' '**extinction how life on earth nearly ended 250 million**
