An Efficient Method to
Cluster Longitudinal Data
February 22nd, 2020 -
Background Longitudinal
data are data in which
each variable is**

**measured repeatedly
over time One possibility
for the analysis of such
data is to cluster them
The majority of clustering
methods group together
individual that have close
trajectories at given time
points These methods
group trajectories that**

are locally close but not necessarily those that have similar shapes

However in "Effect of Azithromycin on Airflow Decline Free Survival May 3rd, 2020 - In this modified intention to treat analysis set data cutoff was April 26 2017 A Crosses on the curves indicate censored observations The median interquartile range IQR follow up for the occurrence of airflow decline? free survival among those in the azithromycin group was 15.5 months IQR 4.4-23.1 and was 18.8 months IQR 6.0-23.8 for those in the placebo group"

Serum dehydroepiandrosterone sulfate levels as an February 4th, 2020 - Abstract To assess the significance of the serum dehydroepiandrosterone sulfate DHEAS concentration as a parameter of the individual hormonal milieu two different groups of subjects were studied DHEAS levels were determined 3 times at 6 month intervals in 47 elderly hospitalized women aged 71-94 yr group 1 and 6 times over 2 consecutive weeks in 10 healthy male volunteers aged 24-30'

'Gastroesophageal endoscopic features in cirrhosis April 21st, 2020 - Nowadays gastroesophageal endoscopic features of portal hypertension are the recognized predictive factors for bleeding and

consequently allow the selection of patients for prophylactic therapies
The aim of this prospective study was to investigate the interobserver agreement the interassociations between these features and the relationship between these signs and the degree of hepatic
