chapter introduction to radar systems and signal processing

June 6th, 2020 - 2 chapter one introduction to radar systems and signal processing 3 2r c thus if a target at some time delay t_0 after a pulse is transmitted it is assumed that a target is present at range $r = ct_0/2$ where c is the speed of light once an object has been detected it may be desirable to track its location or velocity a monostatic radar naturally measures position in a'
