May 26th, 2020 - a  
fossil japanese ??  
fossil is a trace or

---

---

piece of an anism  
from the past such  
as a skeleton shell  
or leaf preserved in  
the earth in the  
pokémon world  
fossils of  
prehistoric pokémon

---

---

are items which can  
be revived into  
living pokémon using  
techniques developed  
by the devon  
corporation and a  
research laboratory  
on cinnabar island

---

---

*the two institutions  
purportedly  
developed'*

**'fossils what is a  
fossil fossilera**

May 21st, 2020 -  
body fossils include  
the remains of

---

---

organisms that were  
once living bones  
shells teeth eggs  
etc while trace  
fossils are the  
signs that organisms  
were once present  
footprints tracks

---

---

burrow coprolites  
trace fossils  
represent a data  
source that reflects  
animal behaviors and  
they do not require  
the preservation of  
hard body parts'

---

---

'how do fossils form  
reference

May 26th, 2020 -  
fossils form when a  
dead animal or plant  
is covered by  
sediment eventually

---

---

the anic matter in  
the bone or plant  
such as the blood  
vessels and tissue  
slowly turns into  
rock which bees  
known as a fossil  
according to how

---

---

stuff works the  
process of  
fossilization takes  
place over millions  
of years usually the  
process begins when  
an'  
'how fossils work

---

---

## **howstuffworks**

May 26th, 2020 -  
fossils also form  
only in very  
specific conditions  
regardless of  
whether they re  
petrified carbonized

---

---

mummified frozen or  
encased in a  
substance like tar  
or amber for this  
reason only a  
fraction of the  
organisms that have  
existed on earth

---

---

appear in the fossil  
record or the bined  
total of the fossils  
discovered on earth  
and the information  
learned from them'

***'what do fossils***

of fossils'*

***'where are fossils  
found the institute  
for creation  
research***

---

---

May 26th, 2020 -  
fossils are  
typically found in  
sedimentary rock  
almost all of which  
were originally  
deposited as  
sediments by moving

---

---

water subsequent  
processes hardened  
them into  
sedimentary rock as  
overlying pressure  
squeezed the water  
out and the grains  
were cemented

---

---

together often  
plants and animals  
were trapped being  
buried in the  
sediments as the  
sediments hardened  
into sedimentary  
rock the dead'

May 22nd, 2020 - how  
do fossils form  
there are a number  
of ways that fossils  
may form amber full

---

---

*body insect fossils  
can be found  
preserved in  
hardened tree sap  
called amber these  
fossils can remain  
preserved in amber  
for up to millions*

---

---

*of years  
carbonization  
carbonization is  
when all the  
elements of the  
anism are dissolved  
except for the  
carbon'*

---

---

**'do fossils spawn on  
ground that has a  
design on it**

*May 8th, 2020 - do i  
have to wait for my  
villager in boxes to  
leave before i can*

---

---

*convince a villager  
from another island  
to e build 1 answer  
am i playing animal  
crossing wrong main  
quest 3 answers when  
adopting villagers  
do they keep*

---

---

*furniture the old  
owner gave them or  
does it all reset

wiki

May 26th, 2020 -  
fossils also  
generate coal ore  
although if you want  
to find coal ore it  
is much easier to

---

---

just look in a cave  
however if you do e  
across a fossil and  
mine it for the bone  
blocks it s worth it  
to mine the coal ore  
coal is very helpful  
as it can be used to

---

---

make torches or used  
as fuel'

'how do  
paleontologists  
identify fossils  
american

May 25th, 2020 - a

---

---

paleontologist  
collects as many  
fossils as possible  
from a rock or  
sediment once the  
fossils are prepared  
by scraping and  
cleaning they are

---

---

sorted by geometry  
fossils with very  
similar geometry are  
assumed to belong to  
a single species  
fossils with  
somewhat different  
geometry are assumed

---

---

to belong to a  
different species  
usually the fossil  
species has already  
been studied and  
named' 'what are  
*fossils and how do  
they form*

---

---

May 22nd, 2020 -  
fossils are precious  
traces from the geologic  
past signs and  
remains of ancient  
living things  
preserved in the  
earth's crust the

---

---

word has a latin  
origin from fossilis  
meaning dug up and  
that remains the key  
attribute of what we  
label as fossils  
most people when  
they think of

---

---

*fossils picture  
skeletons of animals  
or leaves and wood  
from plants all  
turned to stone'*

**'learn about

fossils home science  
tools

May 25th, 2020 -  
fossils are most  
monly found in soft  
rocks like limestone  
shale and sandstone  
those rocks get worn

---

---

down by water and  
wind more easily  
than most rocks do  
sometimes larger  
rocks have layers of  
fossils inside of  
them and as the rock  
gradually wears away

---

---

over many years the  
fossils be visible'
