October 31st, 2019 - In the sequel we will denote by  $U A$  the set of unitary elements of  $A$ . Relevant examples of unitary Banach algebras are all unital  $C^*$  algebras and the discrete group algebras  $l^1 G$  for every group  $G$ . The study of unitary Banach algebras is quite recent see [1, 3, 5, 10, 11, 13, 31].
