May 26th, 2020 - back to top year 6

connect fractions, decimals and percentages as different

representations of the same number students solve problems involving the addition and subtraction of related fractions they calculate a simple fraction of a quantity students add subtract and multiply decimals and divide decimals where the result is rational'

'decimals reasoning strategies about the assessment

May 17th, 2020 - relates decimals to fractions it is important for students to understand that decimals can be used to represent fractions and that

fractions can be represented as decimals or percents for example to decide which is greater $1\frac{5}{10}$ or $0\frac{17}{10}$ some students decide that $1\frac{5}{10}$ is greater by renaming $1\frac{5}{10}$ as $0\frac{20}{10}$ or $2\frac{0}{10}$ and paring to $0\frac{17}{10}$ or $1\frac{7}{10}$
