'topological vector space

June 1st, 2020 - a topological vector space x is a vector space over a topological field k most often the real or plex numbers with their standard topologies that is endowed with a topology such that vector addition $x \times x$ and scalar multiplication $k \times x$ are continuous functions where the domains of these functions are endowed with product topologies some authors e g walter rudin"vector space infogalactic the planetary knowledge core

September 24th, 2019 - a vector space also called a linear space is a collection of objects called vectors which may be added together and multiplied scaled by numbers called scalars in this context scalars are often taken to be real numbers but there are also vector spaces with scalar multiplication by plex numbers rational numbers or generally any field the operations of vector addition and scalar'
