October 5th, 2019 - If we fall
back on our guiding
principle that the
gravitational field is
determined by its singular
points poles of various kinds
which stand for the
Newtonian attracting matter
it might be held to mean that
where that field is free of
singularities the
electrodynamic field will be
free of singularities also for
the four electric field
equations are involved in
the ten gravitational
ones"diffusion des

multisum versus
holonomic sequences**

**April 30th, 2020 - The
purpose of the paper is
three fold a we prove that
every sequence which is a
multidimensional sum of a
balanced hypergeometric
term has an asymptotic
expansion of Gevrey type
1 with rational exponents
b we construct a class of
G functions that e from
enumerative binatorics
and c we give a
counterexample to a
question of Zeilberger that
asks whether holonomic
sequences can be" 12000**

'An algorithm putting non
solvable spectral radii of p

March 28th, 2020 - One
has $R_1 R_2 \dots R_r$ We say
that R_i is solvable if $R_i r$
 $? c \ddot{I}$ In this paper we
provide an algorithm
putting non solvable radii
parison of Newton
polygons and putation of
small radii Let r_1 be an
integer A slope sequence
is the data of r real
numbers $s_1 \dots s_r$ in
increasing order'
