artificial intelligence symbolic logic  
and theorem proving the  
widespread intensive interest in  
mechanical theorem proving is  
caused not only by the growing  
awareness that the ability to make  
logical deductions is an integral  
part of human intelligence but is  
perhaps more a result of the status  
of mechanical theorem proving  
techniques in the late"***theorem

*May 26th, 2020 - the wolfram  
language performs theorem proving  
in many forms and many domains  
sometimes the theorem proving is  
an implicit part of other operations  
sometimes it is explicit for axiom  
systems specified using equational
