***BuildingHow gt Products gt Books gt Volume A gt The***

*June 22nd, 2018 - The strip foundation inverted T beam behaves in a way similar to that of spread footings tied together by a connecting beam However due to the fact that the footing and the inverted T beam's web form a unified body along the entire length of the structure the system's inertia is larger therefore its behaviour is more satisfactory'*

**'Machine Learning Group Publications University of Cambridge**

**June 22nd, 2018 - Gaussian Processes and Kernel Methods Gaussian processes are non parametric distributions useful for doing Bayesian inference and learning on unknown functions They can be**

---

**used for non linear regression time series modelling classification and many other problems'**

**'Joist Wikipedia**

June 22nd, 2018 - A joist is a horizontal structural member used in framing to span an open space often between beams that subsequently transfer loads to vertical members When incorporated into a floor framing system joists serve to provide stiffness to the subfloor sheathing allowing it to function as a horizontal diaphragm'

***'ICRTES***
