number theory prime number theorem britannica

May 31st, 2020 - number theory number theory prime number theorem one of the supreme achievements of 19th century mathematics was the prime number theorem and it is worth a brief digression to begin designate the number of primes less than or equal to n by $\pi(n)$ thus $\pi(10) = 4$ because 2 3 5 and 7 are the four primes not exceeding 10 similarly $\pi(25) = 9$ and $\pi(100) = 25$
